PROJECTS (Personal & Client-Based Projects)

Tingloy Ferry Reservation System

April 2025 – May 2025

A Laravel and React-based ferry reservation system that allows users to register, select routes, book and pay for tickets, and board using one-time QR codes. Includes multiple payment options, group booking support, automated passenger tracking, and real-time email notifications.

WebInn

September 2024 – January 2025

A Laravel-based school management system featuring facial recognition for attendance, QR code scanning, and an integrated grading system for students, teachers, admins, and guidance counselors. Built using TensorFlow.js and Face-api.js for real-time facial detection.

Personal Recipe App

March 2025 – April 2025

An Ionic and Laravel API-based mobile application that allows users to explore, save, and create recipes, along with customizable meal planning features designed for convenience and dietary awareness.

Swiftlink – Fiber Internet Billing System (*Confidential*)

February 2024 – April 2024

A PHP-based fiber internet billing and subscription management system for Swiftlink I.T. Solutions. Supports multiple user roles including Admin, Lineman, and Subscriber.

Population Information Management System

July 2023 – September 2023

A PHP-based system for barangay population management, enabling resident registration, household profiling, demographic tracking, census data management, and report generation for local government planning.

Inntayan Cabin Reservation System

November 2023 – December 2023

A PHP-based cabin reservation system for Inntayan Resort featuring booking management and an easy-to-use interface for both guests and administrators.

MSWDO Services Management System

February 2023 – May 2023

A PHP-based system for managing social welfare services such as AICS programs, disability assistance, and senior citizen services. Includes staff and citizen interfaces, automated processing, and reporting tools.

E-Sports Event Management System

November 2023 – December 2023

A PHP-based system that streamlines esports tournament organization, participant

registration, and event management.

Discover Diffun Quirino Province

September 2023 – November 2023

A PHP tourism website integrated with Google Maps API, showcasing tourist attractions in Diffun, Quirino Province with interactive maps, location markers, and mobile-responsive design.
